- **In Romania, students will interpret the chosen or created songs, in their mother tongue. This performance will be recorded by the Romanian team.**
- After the Romanian mobility, each country will receive their own recordings, including subtitles in English and they will be sent to Spain so that these songs can be played with their subtitles in English during the May meeting in Spain

#### b) **Flashmob:**

- Spain is going to create, with the help of the other countries, a song or performance like Bollywood, where more and more students are joining little by little.
- Spain will start this idea, and other countries will participate through videoconferences. There will be previous recordings on the web so that students from other countries are learning them.
